WELDING RESEARCH 1952

INDEX

AUTHORS

	PAGE
APOLD, A.—Some Suggested Causes of Porosity and Hot-Cracking in the Metal-Arc Welding of Plain Carbon Steels	58r
BRADSTREET, B. J.—C.T.S. Weldability Test for High Tensile Structural Steels Welded by the Metal-Arc Process	89r
COLE, J. H.—Argon-Arc Welding of Copper	83r
COTTRELL, C. L. M., LANE, P. H. R.—Correlation of Weldability Tests with Structural Joints, Part I.—Investigations with Tests of the Restrained Fillet Type	2r
COTTRELL, C. L. M., and JACKSON, M.D.—Correlation of Weldability Tests with Structural Joints, Part II.—Investigations with Unrestrained Fillet Tests and Structural Joints	31r
COTTRELL, C. L. M., JACKSON, M. D., and PURCHAS, J. G.—Correlation of Weldability Tests with Structural Joints, Part III.—Investigations with Controlled Thermal Severity Test	50r
DIXON, H. E.—Surface Cleaning of Some Aluminium Alloys Prior to Spot Welding	93r
HINDS, E. G. P.—New Double-Fillet Test for Hot Cracking	27r
JACKSON, M. D., and COTTRELL, C. L. M.—Correlation of Weldability Tests with Structural Joints, Part II.—Investigations with Unrestrained Fillet Tests and Structural Joints	31r
JACKSON, M. D., COTTRELL, C. L. M., and PURCHAS, J. G.—Correlation of Weldability Tests with Structural Joints, Part III.—Investigations with the Controlled Thermal Severity Test	50r
LANE, P. H. R., COTTRELL, C. L. M.—Correlation of Weldability Tests with Structural Joints, Part I.—Investigations with Tests of the Restrained Fillet Type	2r
PURCHAS, J. G., COTTRELL, C. L. M., and JACKSON, M. D.—Correlation of Weldability Tests with Structural Joints, Part III.—Investigations with the Controlled Thermal Severity Test	50r
ROBERTS, J. E.—Resistance Welding of Cold-Headed Bolts	118r
TATE, A. E. L., and BALL, J. G.—The Weldability and Weld Strength of Some Magnesium Alloy Sheet Materials	13r
WARREN, W. G.—Fatigue Tests on Defective Butt Welds	112r
WECK, R.—Experiments on Brittle Fracture of Steel Resulting from Residual Welding Stresses	70r
WELLS, A. A.—Note on the Mechanics of Notch Brittle Fracture	68r

TITLES

	PAGE
Argon-Arc Welding of Copper, by J. H. Cole	83r
Correlation of Weldability Tests in Structural Joints, Part I.—Investigations with Tests of the Restrained Fillet Type, by C. L. M. Cottrell and P. H. R. Lane	2r
Correlation of Weldability Tests in Structural Joints, Part II.—Investigations with Unrestrained Fillet Tests and Structural Joints, by C. L. M. Cottrell and M. D. Jackson	31r
Correlation of Weldability Tests in Structural Joints, Part III.—Investigations with the Controlled Thermal Severity Test, by C. L. M. Cottrell, M. D. Jackson and J. G. Purchas	50r
C.T.S. Weldability Test for High Tensile Structural Steels Welded by the Metal-Arc Process, report prepared by B. J. Bradstreet	89r
Experiments on Brittle Fracture of Steel Resulting from Residual Welding Stresses, by R. Weck	70r
Fatigue Tests on Defective Butt Welds, by W. G. Warren	112r
Metal-Arc Welding of Aluminium-Magnesium Plate, report prepared by P. T. Houldcroft	106r
New Double Fillet Test for Hot Cracking, by E. G. P. Hinds	27r
Note on the Mechanics of Notch Brittle Fracture, by A. A. Wells	68r
Resistance Welding of Cold-Headed Bolts, by J. E. Roberts	118r
Some Suggested Causes of Porosity and Hot Cracking in the Metal-Arc Welding of Plain Carbon Steel, by Arne Apold	58r
Surface Cleaning of Some Aluminium Alloys Prior to Spot Welding, by H. E. Dixon	93r
Weld Hardenability of Chromium-Molybdenum Steel Pipe	43r
Weldability and Weld Strength of Some Magnesium Alloy Sheet Materials, by J. G. Ball and A. E. L. Tate	13r
